

## **SPYRY INTERNSHIP PROGRAM**

### **DUSSHERA 2017**

**Dear Student,**

**Greetings from Spyry Technologies.**

**Please read all the below details clearly...!**

#### **What is Internship?**

Internship is a position of a student or trainee who works in an organization, to learn and gain work experience.

#### **What will you do in internship?**

Internship @ Spyry Tech, includes both training and live working on a project.

As an Intern in Spyry, firstly you will be given training on various concepts related to cyber security and information security. After that you will be working on different modules of Vulnerability Assessment and Penetration Testing. The concepts will include Foot Printing (Gaining Information about a Target), Scanning (Checking for loopholes), Hacking (Exploiting and taking advantage) and then securing a web application/website (Securing the Application). The internship will be more of practical including hands-on experience and live working on various web application exploits, finding vulnerabilities and security modules.

**The Theory : Practical Ratio is 30:70**

#### **Why Internship?**

This will help you gain hands-on experience.  
Internship will also get you more job opportunities.
